ASA Electronics® Debuts iN-Command Global Connect™

FOR IMMEDIATE RELEASE

ELKHART, IN. – ASA Electronics is excited to announce the next stage of campsite control with iN-Command Global Connect. The newest generations of iN-Command Pro and Pro Plus Control Systems will be equipped with this new feature that allows RV owners to stay in control of their RV from anywhere in the world using the all-new iN-Command app.

iN-Command Global Connect will allow iN-Command customers to monitor tank levels, battery voltage, and temperature as well as control lights, water heater and pump, generator, and HVAC using an internet or cellular data connection.

“People are getting used to having technology at their fingertips in their homes. We wanted to bring that same smart home technology to their campsites,” RV Industry Manager, Jim Hess, said. “iN-Command Global Connect adds another layer to that, where RV owners can maintain control of their RV from pretty much anywhere.”

In addition to extending the reach of iN-Command Control Systems, iN-Command Global Connect also makes it easier to maintain the system. With this new feature, the system has the ability to run software updates automatically when an update is required. The new iN-Command Control Systems offer the added benefit of remote diagnostic support. Using Global Connect technology, our trained iN-Command service technicians will have the ability to communicate directly with the system. This on-the-spot troubleshooting will make it faster and easier for dealers to get their customers back on the road.

ASA Electronics will debut their new iN-Command Control Systems with Global Connect at the National RV Trade Show in Louisville, KY. Drop by booth 269 in the North Wing Lobby of the Kentucky Exposition Center.

ASA Electronics® has been designing and manufacturing mobile electronic products for the Marine, RV, PowerSports, Agricultural, Construction, Commercial Vehicle, and Bus industries since 1977. Their proprietary brands are JENSEN®, JENSEN Marine®, JENSEN Heavy Duty®, iN-Command®, Marine Audio®, Voyager® and ADVENT® Air.
