

ASA Electronics releases the JHD916BT to the market

FOR IMMEDIATE RELEASE

ELKHART, IN. – ASA Electronics is on the forefront of engineering technology made especially for the heavy duty market, the latest of which is the JHD916BT. This Bluetooth, Sirius XM Ready, weatherproof stereo is specially designed to withstand the uncommonly harsh environment of the heavy duty market. Its small size, deemed “mini”, sets it apart from its counterparts and allows it to fit into almost any space inside a vehicle.

Don't let the JHD916BT's size fool you; this stereo was engineered with our customers' favorite features in mind. That includes Bluetooth hands-free calling, 12V DC power, rear USB inputs, aux front and rear inputs, and Sirius XM capability.

This model also comes equipped with seven-channel NOAA weather band to keep our customers one step ahead of changing weather conditions. The JHD916BT will even switch automatically to the NOAA channels in the event of a severe weather alert in the area.

Navigating through all these functions is a breeze with the JHD916BT's daylight readable display but you won't just be controlling your stereo! The new model is iPhone/iPod compatible through the USB, allowing you to charge your device and control it all from your stereo's display.

ASA Electronics® has been designing and manufacturing mobile electronic products for the Marine, RV, PowerSports, Agricultural, Construction, Commercial Vehicle, and Bus industries since 1977. Their proprietary brands are JENSEN®, JENSEN Marine®, JENSEN Heavy Duty®, Marine Audio®, Voyager® and ADVENT® Air.
