ASA Electronics® upgrades best-selling wireless observation system

FOR IMMEDIATE RELEASE

ELKHART, IN. – ASA Electronics has added a brand new monitor to their best-selling Voyager wireless observation system. Their WVOS43 now allows drivers to view more with less using its wide angle views in a compact 4.3 inch display that can be stowed easily in the center console or glove compartment when not in use.

“Our customers asked for a more compact monitor and more camera versatility. So we delivered with the WVOS43, allowing for a great picture with multiple camera connectivity,” Pat McCullough, V.P. of Sales at ASA Electronics said.

As with the previous monitors, the WVOS43 offers WiSight® auto-pairing of up to four wireless cameras so the driver can see all the important angles of their vehicle at any time, even while on the road. The included camera features a CMOS lens, built in microphone, and excellent low-light performance. The system also transmits signals through and around objects up to 60 feet away.

This system offers manufacturers the opportunity to provide a truly mobile wireless observation system that is easy to use, handle and store.

For more information on this system, contact RVInfo@ASAElectronics.com or go to ASAElectronics.com/view-more-with-less.

ASA Electronics® has been designing and manufacturing mobile electronic products for the Marine, RV, Agricultural, Construction, Van, Commercial, Bus and Limo industries since 1977.
