ASA Electronics® Introduces Updated Polk Ultramarine® Commander

FOR IMMEDIATE RELEASE

ELKHART, IN. – ASA Electronics is offering boat builders more flexibility with the Polk Ultramarine® UMC1 App Ready Controller. The UMC1 is compatible with PA4ATAB and UM2TAB hideaway modules to work with both entry level Polk Ultramarine sound systems and Polk Ultramarine Complete DSP Sound Systems.

The UMC1 offers customer favorite features like satellite radio connectivity as well as Bluetooth streaming and App control with the Polk Ultramarine app for Android and iOS devices. The redesigned controller merges the best qualities of the PA4A and UM2 controllers and improves upon them.

The UMC1 has a smaller overall footprint, similar to the PA4A, to minimize space on the dash and can be either flush mounted or the included trim ring can be removed for a front mount installation. We've incorporated the full color TFT display of the UM2 for easy viewing in direct sunlight as well as adding a glass lens over the LCD screen to protect the display from chemicals like sunscreen and boat cleaning solvents.

Like all Polk Ultramarine products, the UMC1 is constructed of UV and corrosion resistant materials. It is also waterproof with an IPX5 rating and features a conformal coated circuit board to ensure the product can stand up to the rigors of boating life.

ASA Electronics® has been designing and manufacturing mobile electronic products for the Marine, RV, PowerSports, Agricultural, Construction, Commercial Vehicle, and Bus industries since 1977. Their proprietary brands are JENSEN®, JENSEN Marine®, JENSEN Heavy Duty®, iN-Command®, Marine Audio®, Voyager® and ADVENT® Air. ASA is also a distributor in specialty markets for SiriusXM® Satellite Radio, Polk Ultramarine®, Klipsch®, and XKGLOW® products. For more information, please visit www.ASAElectronics.com.
