ASA Electronics® Develops New Replacement Rearview Mirror Monitor

FOR IMMEDIATE RELEASE

ELKHART, IN. – Introducing the latest Voyager® Replacement Rearview Mirror Monitor from ASA Electronics. Changing lanes, merging into traffic, and backing-up have never been so manageable.

Real-time, crystal-clear images of your vehicle's blind spots are displayed right on your rearview mirror via a digital signal. The new Voyager® VOM74MM uses a highly-reflective screen that acts as a mirror when the monitor is not active. The VOM74MM will replace the Voyager® VOM73MM to be used in place of the standard OEM option in Light, Medium and Heavy Duty vehicle applications.

The improved robust design of the VOM74MM makes it ideal for commercial vehicle use. The new tactical control buttons along the bottom of the monitor screen enhance the user experience. The tactical control buttons make it easier to manually change camera source selection and adjust the picture. The monitor includes a 7" TFT LCD screen with a 16:9 aspect ratio. It supports three camera inputs for rear and side camera applications. The monitor can be powered manually or automatically triggered by 12VDC power. The Voyager® mirror monitor works with all Voyager® cameras and is a perfect replacement option for rearview mirrors on Ford, GM, Dodge and Sprinter Chassis.

ASA Electronics has been designing and manufacturing mobile electronic products for the Marine, RV, Van, Commercial, Bus and Limo industries since 1977. Their proprietary brands are JENSEN®, JENSEN Marine®, JENSEN Heavy Duty®, Marine Audio®, Voyager® and Advent®. ASA is also a distributor in specialty markets for SiriusXM Satellite Radio and Polk products. For more information, please visit www.ASAElectronics.com.
