## **ASA Electronics® Adds New Camera to Voyager® Offerings**

FOR IMMEDIATE RELEASE

ELKHART, IN. – ASA Electronics is expanding our line of Voyager® observation and safety equipment with the VCAHD140i Heavy Duty Camera. This surface mount camera is easy to install for a variety of applications. The resolution of the VCAHD140i is three times higher than our VCMS140i camera, delivering an unprecedented high definition picture using high performance color optics. The VCAHD140i also utilizes IR low light assist to keep the image clear and bright any time of day. The 146-degree viewing angle and mirror image orientation provide a full picture of vehicle blind spots or when backing up.

Our newest Voyager camera pairs innovative CMOS technology with a heavy duty exterior. The VCAHD140i camera features a waterproof, impact and corrosion resistant aluminum housing designed to withstand any conditions you may encounter on the jobsite.

The VCAHD140i is compatible with all Voyager monitors to complete your observation system. We are continuing to expand our vision of safety with all new products to be announced at this year's Work Truck Show, March 6<sup>th</sup> to March 8<sup>th</sup> in Indianapolis.

ASA Electronics® has been designing and manufacturing mobile electronic products for the Marine, RV, PowerSports, Agricultural, Construction, Commercial Vehicle, and Bus industries

2602 Marina Drive · Elkhart, Indiana 46514
