## **ASA Electronics® Releases Tire Pressure Monitoring System, App**

FOR IMMEDIATE RELEASE

ELKHART, IN. – ASA Electronics is expanding our selection of iN-Command products with our new Tire Pressure Monitoring System (TPMS). Our iN-Command TPMS uses Bluetooth® technology and waterproof sensors to monitor tire pressure and temperature in real time. The sensors can be paired with the specialized iN-Command TPMS app, available on Android and Apple smartphones, to monitor up to 22 tires simultaneously.

The base Four-Sensor System (NCTP100) includes four waterproof sensors, a Bluetooth repeater, four anti-theft locking bolts, and a special wrench needed to unlock the bolts. The repeater extends the Bluetooth signal for longer vehicle applications when mounted between the smartphone and rear tires. A Two-Sensor System (NCTP1002) with anti-theft bolts and locking wrench is also available (repeater not included).

The iN-Command TPMS can be used independent of an iN-Command Control System but can be integrated into the iN-Command app for ease of use.

ASA Electronics® has been designing and manufacturing mobile electronic products for the Marine, RV, PowerSports, Agricultural, Construction, Commercial Vehicle, and Bus industries since 1977. Their proprietary brands are JENSEN®, JENSEN Marine®, JENSEN Heavy Duty®, iN-Command®, Marine Audio®, Voyager® and ADVENT® Air. ASA is also a distributor in specialty markets for SiriusXM® Satellite Radio, Polk Ultramarine®, Klipsch®, and XKGLOW® products.
