Premium Polk Ultramarine® Sound System Available on Regulator Boats

FOR IMMEDIATE RELEASE

ELKHART, IN. – ASA Electronics has changed the marine entertainment landscape with their Polk Ultramarine® Complete DSP Sound System, now available on all Regulator Marine boats. Regulator has made this innovative sound system standard on their 41-foot offshore models and a premium audio option on all other boats, including the brand new 26XO that debuted at the Miami Boat Show.

Every Regulator Marine boat featuring the Polk Ultramarine system has been custom-tuned using true DSP technology to create a studio quality listening experience for every seat on the boat. This premium sound system delivers crisp, clear audio by optimizing the music itself and eliminating unwanted interference or distortion, no matter how low or high the volume.

“This is sound you have to hear to believe. It really is the best system out there and if you don’t believe me, come listen to it for yourself,” said Brent Barrow, President of ASA Electronics.

All models using the Polk system have been outfitted with an array of speakers, all positioned and installed with great attention to detail to ensure the sound is perfect for each application. The 41 Offshore features 10 speakers and two subwoofers that are positioned and tuned to create four distinct listening zones on the boat. The system is completed with the Polk UM2 stereo, offering Bluetooth streaming and control of using the Polk Ultramarine app, available for Android and Apple devices, to give Regulator owners complete control of their music.

Catch Regulator Marine in booth F45 at the Atlantic City Boat Show until March 3rd!
