Raising the bar to new heights with shallower depths

ASA Electronics debuts the JSB2000 sound bar with smaller mounting footprint

FOR IMMEDIATE RELEASE

ELKHART, IN. – Adding to the momentum gained by ASA Electronics' recently released larger sound bar, the leading technology company has

officially unveiled the JSB2000. It is equal in quality with a smaller footprint for those space conscience RV manufacturers. The JSB2000 was designed by the company's innovative engineering department with a ported and tuned enclosure mounting, ensuring the best possible sound every time.

“The JSB2000 offers a solution to the customer who wants to add a sound bar with a clean look and installation to their audio package and deliver high quality sound performance with limited real estate. Also in line with the JSB4000, no remote control is needed for this sound bar as everything is controlled from your favorite JENSEN stereo,” Jim Hess, RV industry manager at ASA Electronics said.

This sound bar offers the same clean look as its JSB4000 predecessor as a non-amplified version. This new addition to the lineup still offers six speakers (two each of woofers, mid-range speakers, and tweeters) to separate the low, mid, and high range frequencies to produce incredible sound.

With a mounting depth of just 5.65”, this sound bar boasts incredible sound with home theater-like surface mount installation. It is the perfect addition to a high end looking and sounding RV home entertainment system.

ASA Electronics® has been designing and manufacturing mobile electronic products for the Marine, RV, PowerSports, Agricultural, Construction, Commercial Vehicle, and Bus industries since 1977. Their proprietary brands are JENSEN®, JENSEN Marine®, JENSEN Heavy Duty®, Marine Audio®, Voyager® and ADVENT® Air. ASA is also a distributor in specialty markets for SiriusXM® Satellite Radio and Polk Ultramarine® products. For more information, please visit www.ASAElectronics.com.
